**PATNA UNIVERSITY**  
102 years of EXCELLENCE

Our core values comprise a responsible reevaluation of the rich scholastic tradition of Patna University and focus on future challenges to build worthy human values and professional capital for Bihar and India. We strive to build a scholarly community engaged in regular and committed teaching; quality research; co-curricular, sporting and socially productive activities, and timely fair examinations. Our responsibilities to civil society include innovation and creative re-interpretation of existing forms of indigenous and received knowledge, connecting productively with global academia, industry, government and civil society in promoting common interests. We attempt to facilitate professional competence, encourage leadership qualities and cultivate positive interests, attitudes and moral intellectual values to produce worthy ambassadors in every discipline. Patna University is a place where students irrespective of their background and identity learn to pursue truth through rational enquiry; where teachers inspire students to higher levels; where academic freedom is valued and protected; where independence of mind, intellectual integrity and artistic expression promote understanding and where students inspired by their dedicated teachers learn to become responsible citizens and leaders of a humane civilisation.
